TRIBECA COLLECTION

Simple and clean design, balanced proportions and a great ability to easily morph from a style to another. In the version with metal legs, it becomes a modern, light piece of furniture, while when with wooden legs, it becomes elegant and stylish. The playful or the tone-on-tone combinations between the wood and metal colors, as well as the perfect combination of solid oak and robust steel distinguish by beauty, quality and personality the TRIBECA collection.

The Cult collection is the younger sister of the Nordic collection. Even though she has the same strong character of her brother, she is more elegant, more understanding and more adaptable. And for each deep scar that the far North has left in her solid oak wood, she has a story prepared to caress your soul and to arouse your imagination.

LOFT COLLECTION

Simple and very friendly design meets the warmth and optimism of European Oak. Saint-Exupery once said that perfection is achieved not when there is nothing to add but when there is nothing to remove. And nothing can be truer when it comes to the design of the Loft collection. It stands out through its simplicity, innovative elegance, ergonomics and balance.

HUNTERS COLLECTION

The durability and natural beauty of the oak combined with a design of Germanic origin. The Transylvanian Saxons (Siebenbürger Sachsen) are a people of Germanic ethnicity, stout-hearted and proud, who came to this region in the 12th and 13th centuries to defend the south-eastern border of the Kingdom of Hungary. They have left their imprint not only on the architecture of buildings and on the organisation of communities in this part of Europe, but also on furniture making. HUNTER'S represents a harmonious blend of the Saxon design and the serene atmosphere of rural communities in the heart of Transylvania, where the bond between man and nature is as close as it was a thousand years ago. This suite of furniture brings a whiff of the Carpathians into your home and puts you in mind of magnificent forests, flowery glades, crystal-clear springs and snow-capped mountain peaks.

COLOR PALETTE

Cioata finishes have both the role of protecting the wood from external factors and to accentuate its natural beauty. Some collections have scraped surfaces. The purpose of applying this exclusively manual procedure is to further emphasize the beauty of solid wild oak.
